VNR VIGNANA JYOTHI INSTITUTE OF ENGINEERING AND TECHNOLOGY

(AUTONOMOUS)

III B.Tech. I Semester 2nd Sessional Examinations (Make-up), January 2024

PROFESSIONAL ETHICS AND HUMAN VALUES

(Open Elective)

Time: 120 Minutes **Date of Examination: 03.Jan.2025** **Max. Marks: 30 Marks**

PART-A

I. Answer all the following in not more than 3–5 lines: **5 × 2 Marks = 10 Marks**

1.	Define accountability.	CO-3	BL-1
2.	List any two risks of digital technologies.	CO-4	BL-2
3.	Give two examples of sustainable development in your discipline of engineering/ technology.	CO-4	BL-2
4.	Define culpability.	CO-5	BL-1
5.	Comment on ethical concerns pertaining to multinational companies.	CO-5	BL-2

PART-B

II. Answer one question from each unit. **1 × 4 Marks = 04 Marks**
2 × 8 Marks = 16 Marks

UNIT-III

1.	Write a brief note on how and why technology and sustainable development goals are related, using examples as may be needed.	CO-4	BL-3

(OR)

2.	How can professional societies guide a STEM professional?	CO-3	BL-2

UNIT-IV

3.	With suitable examples from our daily lives and professional activities, elaborate the need for digital ethics in the society today.	CO-4	BL-4

(OR)

4.	Why is it important for engineers to study environmental ethics? Explain, with examples from your own engineering/technology discipline, where you may have to be concerned about them and/or implement.	CO-4	BL-4

UNIT-V

5.	Why is it important to ensure that workplaces are compliant to Diversity, Equity, Inclusion, and Accessibility (DEIA)? Do you see any practices at VNRVJIET which may be steps towards DEIA? Make at least two suggestions that can be implemented at VNRVJIET in this regard.	CO-5	BL-5

(OR)

6.	In an essay titled "Historical Perspectives on War Ethics: A Comprehensive Analysis" <https://totalmilitaryinsight.com/historical-perspectives-on-war-ethics/>, the team of authors/ editors comment thus while discussing "Technological Advancements and Ethical Implications": *"Autonomous weapons systems raise critical questions about moral responsibility. When machines make life-and-death decisions, the ethical frameworks established by historical perspectives on war ethics face scrutiny. The delegation of such authority to algorithms can blur the lines of accountability between combatants and military leaders."* As a student of engineering who has studied professional ethics and human values, what are your ideas of war ethics and use of autonomous technology in wars? Do you think all wars are essentially unethical? Justify your answer. Your commentary may go beyond accountability and beyond autonomous weapons systems but use very little or no hypothetical scenarios and more real scenarios from recent news on wars in your answer	CO-5	BL-4
