22OE1HS01											R22

VNR VIGNANA JYOTHI INSTITUTE OF ENGINEERING AND TECHNOLOGY

(AUTONOMOUS)

III B.Tech. I Semester 2nd Sessional Examinations, December 2024

PROFESSIONAL ETHICS AND HUMAN VALUES

(Open Elective)

Time: 120 Minutes **Date of Examination: 06.Dec.2024** **Max. Marks: 30 Marks**

PART-A

I. Answer all the following in not more than 3–5 lines: **5 × 2 Marks = 10 Marks**

1.	Do you think an engineer should be held legally responsible if an autonomous technology (such as a robot, driverless car, or automated machine) causes harm? Justify in brief.	CO-3	BL-3
2.	What is carbon footprint?	CO-4	BL-2
3.	Do you think engineers of all disciplines must contribute towards sustainable development? Justify in brief.	CO-4	BL-3
4.	Define collegiality.	CO-2	BL-1
5.	Give two examples of any aspects of DEIA at workplace.	CO-5	BL-

PART-B

II. Answer one question from each unit. **1 × 4 Marks = 04 Marks**
2 × 8 Marks = 16 Marks

UNIT-III

1.	What is informed consent? Why is it important and in what cases is it necessary? Give one real-world example for seeking or not seeking informed consent in personal and/or professional context.	CO-3, CO-5	BL-3

(OR)

2.	Why should an engineer's activities must be ethical by design? Give real/ hypothetical examples of what worst can happen if ethics are not considered during design, taking the context of any science, technology, or engineering applications, or alternatively data ethics or environment ethics.	CO-4	BL-4

UNIT-IV

3.	On 17 March 2022, in the backdrop of the ongoing Russia-Ukraine War, a video of Ukrainian President, Volodymyr Zelensky, appealing to his armies to surrender. Zelensky had to post on Telegram that it was a "deepfake" video. As a possible retaliation, a deepfake video of Russian President, Vladimir Putin, resurfaced showing him declaring peace amidst the fake. This was the first time an ongoing war involved deepfakes to spread wrong information. Meta, Twitter, and YouTube have identified and marked these videos as fake subsequently. *"It is a new weapon and a potent form of visual disinformation—and anyone can do it."*, said Ms Nina Schick, who authored the book "*Deepfakes*". (Reference: Jane Wakefield, "Deepfake presidents used in Russia-Ukraine war", 18 March 2022. <https://www.bbc.com/news/technology-60780142>) As a student of engineering ethics, how do you see war and peace situations of the future world? Propose how we may be able to restore a general trust towards information within societies, in the context of digital ethics?	CO-4	BL-5

(OR)

4.	Mr Shahnawaz Khan, an advocate in Bhopal, had revealed on 01.12.2024 that one worker at the Union Carbide factory died on 25.12.1981 due to a phosphene gas leak, 25 workers were hospitalised on 09.01.1982, another gas leak was reported in March 1982, and hundreds of residents near the factory were hospitalised in October 1982 due to yet another gas leak. Following these series of incidents, he had served a legal notice on 04.03.1983 to the factory to *"stop usage of toxic gases and hazardous and poisonous chemicals in your factory within 15 days*" but the factory denied that all allegations were baseless. (Reference: <https://www.msn.com/en-in/news/India/ar-AA1v3je2>)	CO-3, CO-5	BL-4

In this context, explain the violation of professional ethics and business ethics by the factory. Also explain professional role being played by the advocate as a guardian (of public interest), justifying the definition of a professional.

UNIT-V

5. Explain the various measures through which an organisation make itself ethical. You may take examples of one or more organisations in presenting your answer, encompassing policies and frameworks, organisational behaviour, ethical climate, and ethical leadership. CO-4 BL-4

(OR)

6. In an interview with Film Companion in March 2023, popular actor-producer Mr RaNa Daggubati was asked why Telugu film industry "*does not get the flak like Bollywood does, for nepotism*". (According to Wikipedia, "Nepotism" is "*the act of granting an advantage, privilege, or position to relatives or friends in an occupation or field*".) RaNa replied that the Telugu film industry, unlike Bollywood, has been held together because of some families from the film fraternity which built studios and stabilised the Telugu film industry in Hyderabad. *"That's the love we have for art and storytelling."*, he said, adding that people from these few families loaned money, mortgaged homes and land to create resources and make movies. RaNa revealed in the same interview that his first film as a producer, "*bommalaaTa*" (also known as "A *Belly Full of Dreams*"), won two national awards in 2005 (Best Feature Film in Telugu, Best Child Artist) but could not get a theatrical release since it was seen as "art house" kind of film. (Reference: <https://www.youtu.be/MqMnGMIdTXc>) CO-5 BL-4

   Do you agree with RaNa that nepotism can present a privilege that may be leveraged in an utilitarian way? Or do you think RaNa was cleverly kicking the ball out of his court because he may also be seen as a product of nepotism, because of his father and grandfather being producers and his uncle being an actor? In either case, how do you interpret the "*bommalaaTa*" example presented above? **Do not extend or extrapolate into aspects of the individual that RaNa is, beyond what is presented above, but you may take other examples of RaNa or other Telugu film personalities to present your case only if you can cite any definite references (during the exam) for any claims you make.** (Your example will be considered only if there is a verifiable reference.)
