Subject Code 22OE1HS301

R22

VNR VIGNANA JYOTHI INSTITUTE OF ENGINEERING AND TECHNOLOGY

(AUTONOMOUS)

B.Tech. III year I Semester Regular/Supplementary Examinations, December 2025

PROFESSIONAL ETHICS AND HUMAN VALUES

(Open Elective)

Time: 3 hours **Date of Examination: 19.Dec.2025** **Max. Marks: 60**

Answer ALL questions in Part-A.
Answer any ONE question from each unit in Part-B.

PART-A **5 × 2 = 10 M**

a)	Explain the difference between morals and values.	2M	CO-1	BL-2
b)	What is Deontological Ethics?	2M	CO-2	BL-2
c)	Explain the term informed consent.	2M	CO-3	BL-1
d)	Define Intellectual Property (IP).	2M	CO-4	BL-1
e)	Define occupational crime.	2M	CO-5	BL-1

PART-B **5 × 10 = 50 M**

UNIT-I

1.	a) Illustrate the ethical and moral issues involved in the Trolley Problem, with at least two cases of the problem.	6M	CO-2	BL-3
	b) Explain the importance of Value Judgement and Moral Judgement in decision-making.	4M	CO-1	BL-2
	OR			
2.	a) Explain the relationship between ethics, values, and sustainable development goals (SDG) with examples.	5M	CO-1	BL-2
	b) Why do you think it is important for engineering students to learn human values before learning professional ethics?	5M	CO-1	BL-4

UNIT-II

3.	a) Explain Kohlberg's stages of moral development with examples.	5M	CO-2	BL-2
	b) Explain the core principles of Virtue Ethics according to Aristotle.	5M	CO-2	BL-2
	OR			
4.	Maslow's hierarchy of needs suggests a universal pyramid that applies to all genders, while Gilligan's and Kohlberg's theories highlight distinct moral and psychological orientations between men and women. Considering these perspectives, should human motivation be represented by a single, unified pyramid for everyone, or would it be more accurate to design separate pyramids for men and women? Justify your reasoning.	10M	CO-2	BL-2

UNIT-III

5.	a) Describe the ethical responsibilities of a STEM professional as a manager or leader.	5M	CO-3	BL-3
	b) Explain the importance of DEIA and SDG in STEM professions.	5M	CO-3	BL-3
	OR			
6.	In her book chapter titled "*Citizen Science and Responsible Research and Innovation*", Melanie Smallman identifies Responsible Research and Innovation (RRI) as "*a key approach to mediating the relationship between science and society to tackle social challenges*" and adds that "*citizen science could learn lessons from RRI approaches and processes especially in terms of meaningful citizen participation.*" She concludes that "*A more responsible citizen science would need to engage with issues of participation, agenda-setting (including power relations), and acting responsibly—and collectively.*" (Source: https://www.jstor.org/stable/j.ctv550cf2.24)	10M	CO-3	BL-4

	"Citizen science" here refers to "the active participation of the public in scientific research projects" and is expanding in open science and open innovation (Source: https://www.sei.org/publications/ten-principles-citizen-science) Present your understanding of engineering as a profession and as social experimentation. In that connection, explain the need for social context of innovation that reflects in the content above cited from Melanie Smallman's chapter and elaborate on the professional role of engineers in ensuring citizen science. Use relevant keywords, definitions, and examples in presenting your answer.			
	UNIT-IV			
7.	a) Apply ethical principles and analyse deviances in the Titanic disaster.	7M	CO-4	BL-3
	b) Illustrate the importance of non-disclosure agreements in professional ethics.	3M	CO-4	BL-2
	OR			
8.	a) Elaborate about environmental ethics and the need to reduce carbon footprint in industries.	4M	CO-4	BL-2
	b) Explain why digital ethics are important in today's world, given the context of AI, ML, and cloud computing with suitable examples.	6M	CO-4	BL-2
	UNIT-V			
9.	a) Analyse the effects of workplace deviance on organisational climate.	5M	CO-5	BL-4
	b) Examine how religion and spirituality shape societal moral standards.	5M	CO-1	BL-2
	OR			
10.	Betting apps and real-money gaming platforms like 1XBET, despite legal restrictions, continue to advertise aggressively on social media and the internet. These ads often target vulnerable groups such as middle-class families, elderly individuals, and even illiterate audiences, portraying unrealistic success stories (e.g., buying scooters or sudden wealth). Moreover, young students, including B.Tech learners, are drawn into betting when facing financial needs. In this context, beyond business ethics, what other ethical dimensions are being violated (such as social ethics, media ethics, or educational ethics), and what strategies should be adopted to eradicate these unethical practices?	10M	CO-3	BL-4
